

HOSPITAL

Secure HIPAA Compliant Controlled File Sharing

Who:

- Government-run hospital that is a global leader in geriatric residential living, healthcare, research, innovation, and education, with a special focus on brain health and aging.

Need:

- Secure, HIPAA-compliant remote access and file sharing for their legal and research departments.
- Due to recent price increase and budget constraints, they needed a cost-effective alternative to their existing solution.
- Needed an easy-to-use, secure and compliant solution to share consent and collaboration documents with patients and other hospitals.
- Needed a way for IT to control sharing of sensitive patient information and limit file shares to 30 days maximum.

Fileflex Enterprise Solution Provided:

- Provided their research and legal departments, secure sharing of files located anywhere on the hospital's multi-domain hybrid-IT infrastructure of on-premises, cloud-hosted and SharePoint storage.

- Was a fraction of the cost of their existing solution providing significant cost savings to the hospital.
- Provided both users and IT control over share permissions meeting the requirement to limit file shares to 30 days maximum.
- Provided the ability to restrict sharing and access of PHI, PII, and hospital confidential information to 'access-only' (no sharing) and 'view-only' (no downloading) with other hospitals when required.
- Provided the hospital an easy way to share large folders that contained x-ray and digital imaging files.
- Provided the hospital zero trust secure processes and robust security over sharing.
- Provided the hospital an activity log over all remote access and sharing activities.
- Provided the hospital an IT management toolkit to control file sharing for their organization.
- Supported the hospital's need to protect PHI and comply with HIPAA equivalent requirements.
